PERSONAL STATEMENT

- **Engineering leader** with **20+ years** in scaling global platform engineering and cloud organizations, supporting enterprise customers in regulated industries
- Led the setup and scale-up of the Global Capability Centre (GCC) for Progress Software in Hyderabad, building distributed engineering, platform, and cloud teams from the ground up.
- Proven success in leading 75+ distributed engineers across platform, database, and cloud services while building strong leadership pipelines and driving a culture of accountability and operational excellence
- Strong track record of partnering with Product, Sales, and Customer Success to define roadmaps, enable enterprise adoption, and influence product direction through customer and operational insights
- Expertise in driving DevOps transformation, release governance, incident management, and operational excellence to improve delivery predictability, reliability, and platform stability
- Demonstrated the capability to lead modernization initiatives to cloud-native architectures & microservices, enabling scalable and high-availability enterprise platforms
- Successfully led enterprise AI platform initiatives including Agentic RAG, Context Engineering, enterprise retrieval systems, AI agents, Model Context Protocols (MCP), evaluation frameworks, and production AI platform architectures for enterprise-scale intelligent automation. Drove measurable business outcomes by improving engineering efficiency and accelerating time-to-market.

HIGHLIGHTS

- Led workforce planning initiatives, optimizing headcount allocation & organizational scalability to support evolving business priorities
- Established engineering performance management frameworks and career progression models to drive accountability, engagement, and talent growth
- Developed and mentored engineering managers and senior technical leaders, strengthening leadership pipelines across the organization
- Directed release planning, prioritization strategies, and execution trade-offs to balance delivery speed, quality, and business impact
- Managed critical incident escalations and executive-level communications, ensuring rapid resolution and stakeholder alignment during high-impact events
- Implemented operational metrics, reliability reviews, and governance frameworks to improve platform stability, engineering efficiency, and execution visibility

WORK EXPERIENCE

Feb 2026 - Present

Global Head of Engineering at SRR Cloud Experts Guru, Hyderabad, India

- Serving as a Global Head of Engineering, driving enterprise-wide technology strategy, innovation, and scalable engineering execution
- Leading the design of enterprise AI platforms incorporating Agentic RAG, Context Engineering, AI Agents, and enterprise retrieval architectures.
- Designing enterprise knowledge representation strategies using vector search, metadata enrichment, and graph-based retrieval approaches for intelligent enterprise applications.
- Driving AI platform architecture including orchestration, evaluation pipelines, prompt management, observability, and governance.
- Working with LangChain, LangGraph, MCP, Vector databases, and modern LLM orchestration patterns.
- Building and scaling high-performance engineering organizations through leadership development, operational excellence frameworks, and forward-looking technology strategy
- Partnering with Sales, Product Management, and Customer Success to accelerate enterprise adoption, enable revenue growth, and translate technical innovation into compelling customer value
- Influencing product roadmap direction through customer technical engagements, strategic reviews, and close collaboration with cross-functional service provider in multi cloud platforms
- Enabling teams to deliver with speed, reliability, and scalability, directly contributing to pipeline growth, customer satisfaction, and long-term retention
- Managing and mentoring engineering professionals across platform, infrastructure, and cloud domains while fostering accountability, ownership, and continuous learning cultures

- Developing future technology leaders and aligning workforce planning and organizational growth with evolving business priorities and market demands

Aug 2021 - Nov 2025 **Director, Software Engineering at Progress Software, Hyderabad, India**

- Directed global platform engineering and cloud transformation programs supporting enterprise customers in highly regulated industries
- Led the establishment of the Progress Software Global Capability Centre (GCC) in Hyderabad, driving org design, hiring strategy, and operating model setup for a 75+ engineer distributed team.
- Built and mentored high-performing leadership teams by coaching engineering managers and senior technical leaders while strengthening succession pipelines
- Oversaw performance management, promotions, succession planning, hiring strategy, onboarding, and organizational scaling initiatives
- Established a culture of accountability, operational excellence, ownership, and execution discipline across engineering teams
- Partnered with Product Management to drive roadmap strategy, release planning, and platform modernization initiatives
- Collaborated with Sales and Customer Success teams to support enterprise adoption, customer escalations, and strategic solution engagements
- Enhanced delivery predictability and release quality through DevOps transformation, automation practices, and operational process improvements
- Introduced incident management, root-cause analysis, and post-mortem review processes, significantly reducing production incidents & improving service reliability
- Elevated resilience and operational stability for mission-critical enterprise platforms supporting large-scale workloads
- Led the modernization of legacy systems into scalable cloud-native and microservices-based architectures
- Led enterprise AI platform initiatives involving Agentic RAG, enterprise retrieval, AI agents, Model Context Protocols (MCP), evaluation frameworks, and production-grade LLM integration for developer productivity and intelligent automation.
- Directed automation and deployment optimization initiatives, reducing deployment timelines and accelerating engineering velocity
- Implemented enterprise-wide monitoring, observability & performance optimization strategies across distributed systems
- Reduced time-to-market by 25% via workflow modernization, process optimization, and engineering efficiency improvements
- Improved platform stability, strengthened customer confidence, optimized infrastructure utilization through cloud adoption, and enhanced overall engineering productivity

EMPLOYMENT HISTORY

Duration	Designation	Organization
Feb 2016 - Jul 2021	Sr. Manager, Software Engineering	Progress Software
Jan 2012 - Jan 2016	Manager, Software Engineering	Progress Software
2007 - 2012	Lead Principal Software Engineer	Progress Software
2006 - 2007	System Analyst	IVY Comptech
2003 - 2006	Executive Software Engineer	Siemens
2002 - 2003	Software Engineer	Ingenious Software

SKILL SET

- Engineering/Visionary/Organizational Leadership
- Business Growth & Go-to-Market Partnership
- Cloud-Native & Microservices Architecture
- Cross-Functional Stakeholder Management
- People & Organizational Development
- Model Context Protocols (MCP)
- Technology & Transformation
- Enterprise Architecture
- Vector databases
- Knowledge Graphs
- LangChain/LangGraph
- GCC Leadership
- Operational Excellence
- Platform Engineering
- Strategic AI Innovation
- GenAI & ML
- AI Platform Engineering
- Agentic AI
- Context Engineering
- Enterprise Retrieval
- DevOps Transformation
- Release Governance
- Incident Management

TECHNICAL SKILLS

- **Cloud Platforms** AWS, Azure, GCP
- **Architecture** Distributed systems, microservices, APIs
- **DevOps** CI/CD, automation, release engineering

- **Data** — Relational and NoSQL databases, data platforms
- **Reliability** — Monitoring, observability, performance optimization
- **Security & Compliance** — Secure architecture and governance practices
- **AI Enablement** — AI & GenAI, LLMs, Agentic AI, LangChain, LangGraph, RAG, Vector databases, Knowledge Graphs, GraphRAG

CERTIFICATIONS

- Amazon Web Services Certified Solutions Architect
- Certified ScrumMaster (CSM) | SAFe Product Owner Certification
- Pragmatic Marketing Certification - Product Management

EDUCATION

- Chief Technology Officer Program from the Indian Institute of Management, Visakhapatnam (IIMV), India
- Master of Computer Applications (MCA) from Sri Krishnadevaraya University, India
- Bachelor of Science (B.Sc.) from Government Arts College, India
